

# Workplace Mental Health Disclosure And Support Dashboard

OSMI Mental Health in Tech Survey | Main story: treatment-seeking is common, but workplace disclosure comfort remains much lower.

**Survey responses**  
1259

**Sought treatment**  
637 respondents (50.6%)

**Know benefits**  
477 respondents (37.9%)

**Any work interference**  
782 respondents (62.1%)

**Supervisor comfort**  
516 respondents (41.0%)

**Coworker comfort**  
225 respondents (17.9%)

**Interpretation: benefit/care-option awareness, work interference, and perceived consequences are strongly associated with treatment-seeking or disclosure comfort. Results are associations, not causal claims.**

Mental Health Treatment-Seeking Among Respondents

Treatment-Seeking Is Higher When Mental Health Support Is Known By Benefits Awareness

By Care Options Awareness

Treatment-Seeking Rate By Work Interference

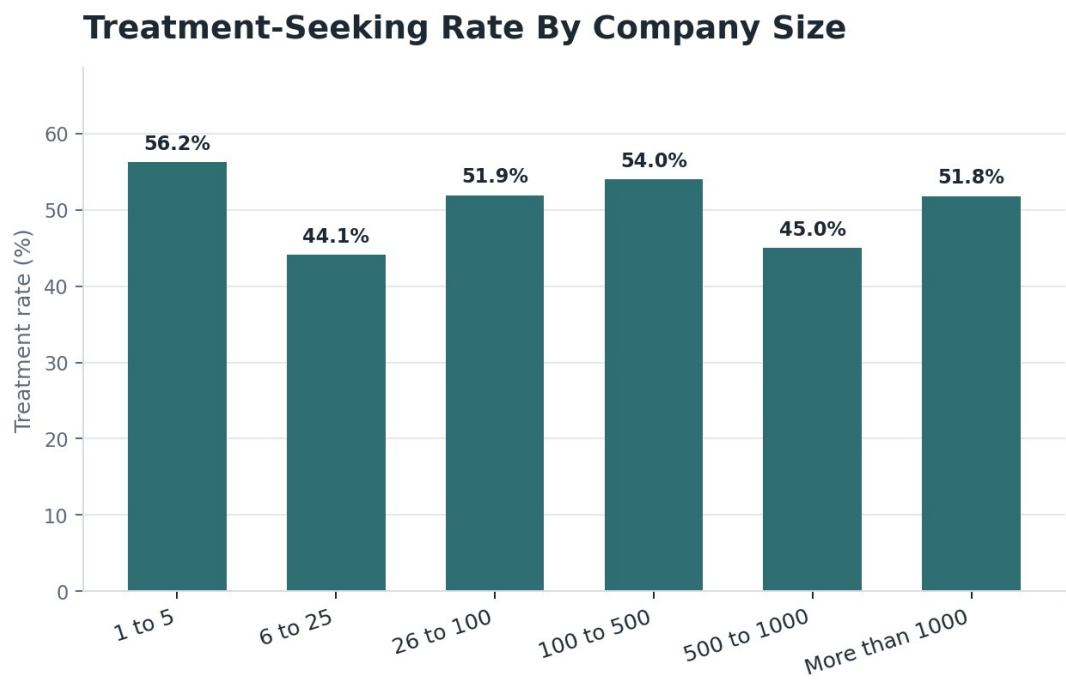

Supervisor Discussion Comfort By Expected Mental Health Consequences

## Treatment by benefits

| benefits   | respondent<br>s | treatment_cou<br>nt | treatment_rate    |
|------------|-----------------|---------------------|-------------------|
| Yes        | 477             | 305                 | 0.639412997903564 |
| No         | 374             | 181                 | 0.483957219251337 |
| Don't know | 408             | 151                 | 0.370098039215686 |

## Treatment by care options

| care_options | respondent<br>s | treatment_cou<br>nt | treatment_rate    |
|--------------|-----------------|---------------------|-------------------|
| Yes          | 444             | 307                 | 0.691441441441442 |
| No           | 501             | 207                 | 0.413173652694611 |
| Not sure     | 314             | 123                 | 0.39171974522293  |

## Treatment by work interference

| work_interfer<br>e | respondent<br>s | treatment_cou<br>nt | treatment_rate     |
|--------------------|-----------------|---------------------|--------------------|
| Often              | 144             | 123                 | 0.854166666666667  |
| Sometimes          | 465             | 358                 | 0.76989247311828   |
| Rarely             | 173             | 122                 | 0.705202312138728  |
| Never              | 213             | 30                  | 0.140845070422535  |
| Missing            | 264             | 4                   | 0.0151515151515151 |

## Treatment by company size

| company_size | respondent<br>s | treatment_cou<br>nt | treatment_rate |
|--------------|-----------------|---------------------|----------------|
| 1 to 5       | 162             | 91                  | 56.2%          |
| 6 to 25      | 290             | 128                 | 44.1%          |

|                |     |     |       |
|----------------|-----|-----|-------|
| 26 to 100      | 289 | 150 | 51.9% |
| 101 to 500     | 176 | 95  | 54.0% |
| 501 to 1000    | 60  | 27  | 45.0% |
| More than 1000 | 282 | 146 | 51.8% |

### Treatment by family history

| family_history | respondent<br>s | treatment_cou<br>nt | treatment_rate    |
|----------------|-----------------|---------------------|-------------------|
| Yes            | 492             | 365                 | 0.741869918699187 |
| No             | 767             | 272                 | 0.354628422425033 |

# Dashboard Submission Notes

Upload this XLSX file to Google Drive and open it with Google Sheets.

Submit the Google Sheets link as the required dashboard deliverable.

The Dashboard sheet is intentionally image-based for stable rendering after Google Sheets conversion.

Source\_Tables, Hypothesis\_Tests, and Model sheets provide the auditable data behind the visuals.

The written report contains the same six chart snippets, and the notebook provides reproducible analysis.
