

Customer Behavior and Revenue Contribution (Dec 2010 to Dec 2011)

This dashboard applies RFM (Recency, Frequency, Monetary) analysis to segment customers based on how recently, how often, and how much they purchase. It compares customer volume, engagement level, and revenue contribution across segments to support targeted marketing and retention strategies.

Customer Segment

- 10% of customers (Best Customers) generate 48% of total revenue (\$4.02M of \$8.39M).
- 1,740 “Other” customers generate less revenue (\$1.08M) than 435 Best Customers (\$4.02M).
- Loyal and Lost customers are similar in size (946 vs 950), but Loyal customers generate 5× more revenue (\$2.20M vs \$0.45M).
