

Workplace Mental Health Disclosure And Support Dashboard

OSMI Mental Health in Tech Survey | Main story: treatment-seeking is common, but workplace disclosure comfort remains much lower.

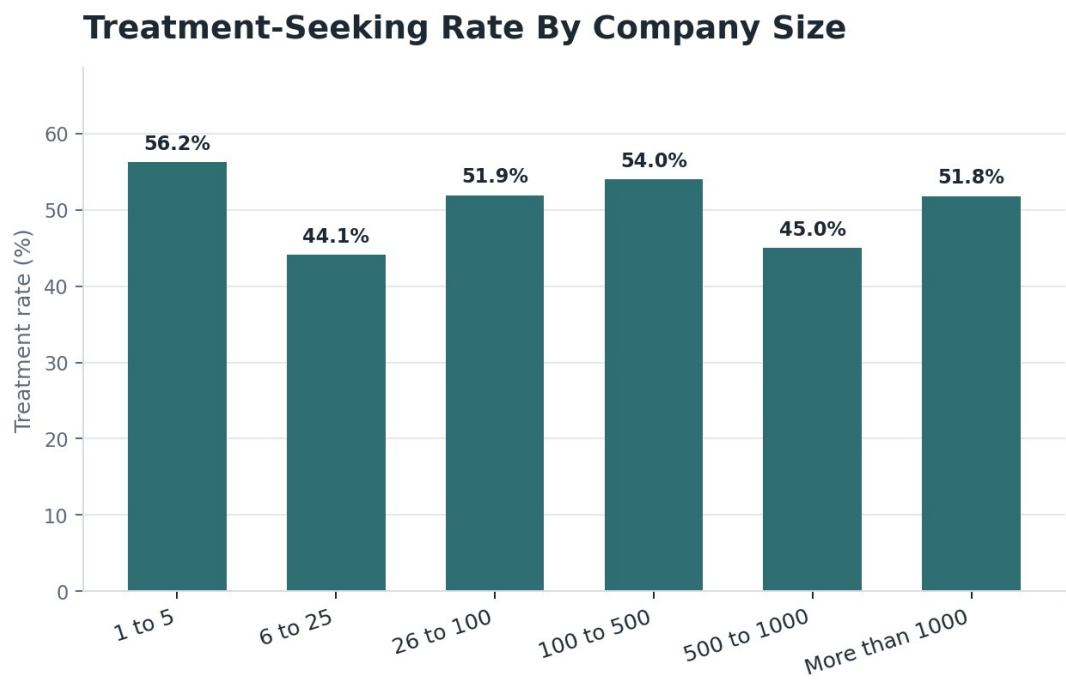

Survey responses 1259	Sought treatment 637 respondents (50.6%)	Know benefits 477 respondents (37.9%)	Any work interference 782 respondents (62.1%)
---------------------------------	--	---	---

Supervisor comfort 516 respondents (41.0%)	Coworker comfort 225 respondents (17.9%)	Interpretation: benefit/care-option awareness, work interference, and perceived consequences are strongly associated with treatment-seeking or disclosure comfort. Results are associations, not causal claims.

Dashboard Submission Notes

Upload this XLSX file to Google Drive and open it with Google Sheets.

Submit the Google Sheets link as the required dashboard deliverable.

The Dashboard sheet is intentionally image-based for stable rendering after Google Sheets conversion.

Source_Tables, Hypothesis_Tests, and Model sheets provide the auditable data behind the visuals.

The written report contains the same six chart snippets, and the notebook provides reproducible analysis.
